

Product information

Indications

Navina™ Systems from Wellspect HealthCare are developed to help adults who suffer from fecal incontinence, chronic constipation, and/or time consuming bowel management. The user may be wheelchair bound and/or have reduced motoric hand function. By instilling water up into the lower part of the colon, the peristaltic muscles in the bowel can be triggered and start to evacuate the colon and rectum.

Contraindications

You should not use Navina™ Smart system if you have one or more of the following:

- Known anal or colorectal stenosis
- Active inflammatory bowel disease.
- Acute diverticulitis.
- Colorectal cancer.
- Ischemic colitis.

- Within three months of anal or colorectal surgery.
- You are within 4 weeks of previous endoscopic polypectomy.

As the list of contraindications may not be exhaustive, healthcare professionals will always consider individual user factors as well.

Navina Smart system

Reference	Type	Content	Life time
69009	Navina Smart system  x 2	1 Navina Smart control unit with charger and power adapter 1 Water container 1 Tube set 2 Rectal catheters 1 Accessory set 1 Navina case

Navina™ Smart

WHEN THE BOWEL WORKS, LIFE WORKS

1. Tubing

- Easy to grip and handle.
- Color-coded and secure connectors to ensure correct assembly intuitively.
- Easy to clean.

2. Water container

- Small collapsible water container for discreet storage and transport.
- Sturdy and with an integrated scale that maintains its accuracy over time.
- Single compartment design makes it easy to fill and empty.
- Easy to open and close even with reduced hand strength and function.
- Integrated lid (no assembly needed) with pressure valve for increased safety.

3. Disposable catheter

- Disposable hydrophilic catheter with rounded tip for maximum comfort, hygiene and safety.
- Flexible balloon design seals the rectum to ensure catheter stays in place and provides a good seal throughout treatment.
- Good grip with connector makes handling easier.
- Balloons tested individually for optimal function and to ensure a good safety margin between maximum inflation and bursting point.

4. Smart control unit

- Smart system allows tailoring of treatment parameters.
- Easy-touch buttons for easy and accurate control of balloon inflation, water flow rate and volume.
- Integrated safety features, including automatic maximums for water instillation and balloon inflation.
- Saves treatment information automatically.
- All information at the patient's fingertips, intuitive, easy to understand and access.
