NEW Aura™ Closed

More freedom to live life with a stoma

New Aura™ Closed features several innovations designed to give you the confidence and freedom to live life to the full.

- Modern, compact design in a range of sizes
- Tailored with pre-cut flat flange designs
- Fast, simple fitting and removal

New Aura™ Closed pouches offer a comfortable, secure and discreet fit.

Manuka honey

One of the key new features of the Aura™ range is the introduction of medical grade **Manuka honey** to our skin-friendly Hyperflex® hydrocolloid. The inclusion of Manuka honey in our Hyperflex® hydrocolloid may help to promote healthy skin around the stoma.

Aura™ Closed – our kindest pouch yet

- Unique HyperFlex® hydrocolloid flange with medical grade Manuka honey
- New Dual-Carb®2 filter for better deodorisation and reduced ballooning
- Easy-to-read flange cutting guide
- Handy Easy2peel™ feature
- Super soft, water-repellent cover
- Choice of beige or clear, in three sizes
- Split back for easy application and monitoring of output

NEW Aura™ Stoma Cap

The new Aura™ Stoma Cap incorporates a range of features, including the unique HyperFlex® hydrocolloid flange with Manuka honey, improved Dual-Carb®2 filter, versatile cutting guide and super soft backing.

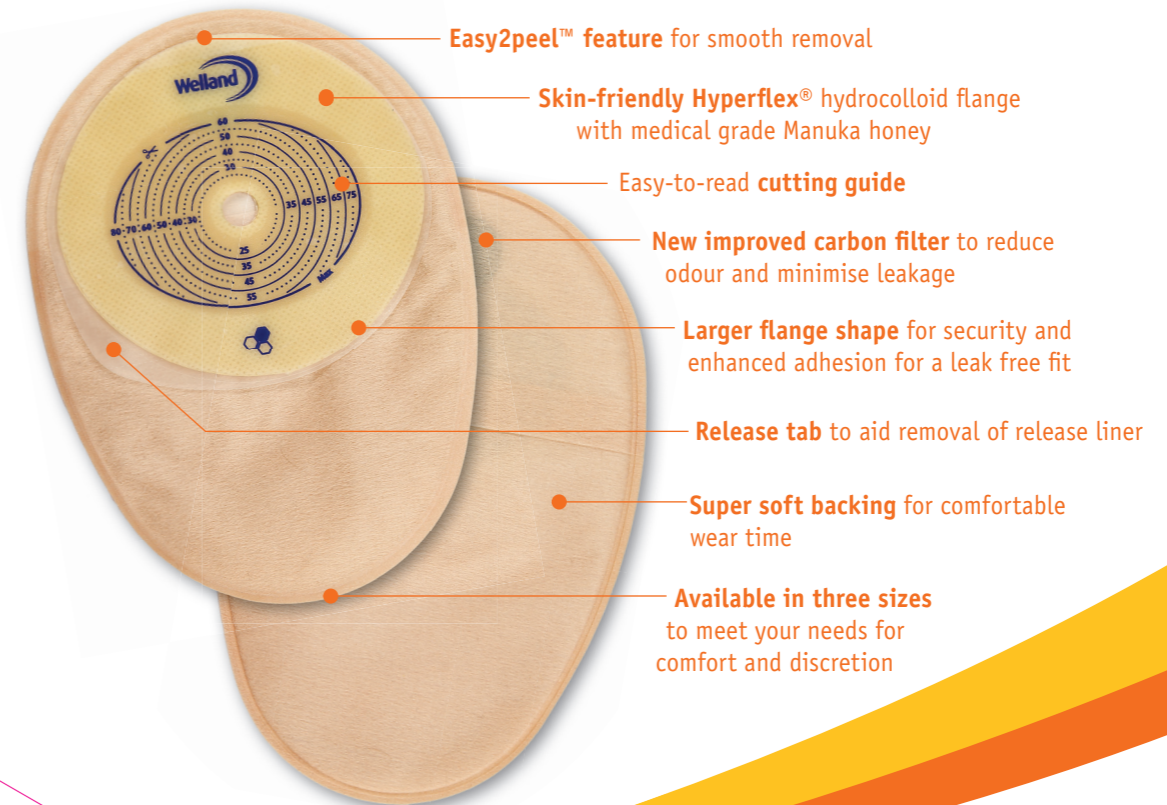

Ideal for short-term wear

- Integral absorbent pad absorbs any leaks and protects the stoma
- Convenient and lightweight to ensure discretion when bathing, showering or swimming
- Can be used as a discreet pouch during intimate activity
- Suitable for use following irrigation

"The shape contours with the body making it almost undetectable under clothing," – Mrs OD.

The benefits of Aura™ Closed

Designed to give a comfortable and perfect fit

Fits snugly, protecting you

- Specifically designed to prevent leakage, the oval-shaped Hyperflex® hydrocolloid flange with Manuka honey is skin-friendly, satisfies adhesion and removal needs and is up to 22% larger than our previous flanges
- Extra adhesion at the 3 and 9 o'clock positions dramatically reduces separation and leakage in the area most at risk from pouch contents
- An improved cutting guide ensures a perfect fit around different stoma sizes and shapes, reducing skin irritation and potential leakage
- Curvilinear shape, contoured to match the shape of the body, ensures a snug, secure fit

Super soft and easy for you to use

- The super soft pouch cover offers exceptional comfort; and quick-drying fabric helps prevent perspiration build-up and makes life easier after bathing, showering or swimming
- A handy Easy2peel™ feature allows smooth removal of the pouch from the skin, making pouch changing quick and easy
- The split back allows easy application and monitoring, and a quiet film cover minimises rustling

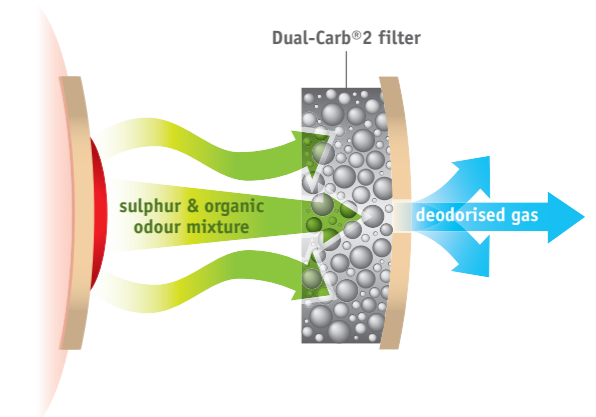

"I found the mini pouch very comfortable and secure, easy and quick to change. I would be delighted to continue using it," – DN, Batley.

Advanced filter technology for better discretion

New improved Dual-Carb® 2 filter

- The new Aura™ filter has improved **deodorisation** when compared to a number of other pouches
- The range also has upgraded **permeability** when compared to a number of other pouches
- Enhanced carbon formulation reduces odours, giving greater discretion over a longer time
- Laser cut filter allows maximum air flow management, helping to reduce ballooning

Added filter protection

- Integrated film layer improves filter efficiency and reduces ballooning
- Seamless compact shape allows contents to move freely to bottom of pouch, reducing clearing time and pancaking
