# GELTEX<sup>®</sup> inside

WHY GELTEX<sup>®</sup> inside ?

Incorporates the essential requirements into a single high performance material

BREATHABILITY

PRESSURE DISTRIBUTION

**BODY SUPPORT** 

in a way you don't get with other materials, because of its unique formula with gel properties. The breathable, open cell structure of the new GELTEX<sup>®</sup> inside technology, provides the patient with a unique comfortable feeling.

GELTEX<sup>®</sup> inside is not temperature sensitive and gently pushes back to provide the all-important patient support Optimal body support is obtained with GELTEX<sup>®</sup> inside technology. Resilience is 5 times higher compared to visco-elastic foam.
