

NASO-FLO®

Nasopharyngeal Airway Device

The Naso-Flo® Nasopharyngeal Airway Device allows for direct oxygen delivery while humidification vents, positioned towards the distal tip, facilitate heat and moisture transfer.

- Manufactured from soft silicone reducing the risk of trauma during insertion
- Colour-coded connectors to aid correct size selection
- Delivers oxygen directly into the pharynx, reducing the anatomical dead space
- The upper airway becomes a natural reservoir for the remaining oxygen once patient tidal volume has been exceeded
- Respiratory Indicator enables CO₂ detection from the distal tip
- Hydrophobic filter reduces risk of monitor contamination
- Suitable for a wide range of clinical applications
- Ventilation adaptor available for connection between Naso-Flo® and breathing system
- Cost effective - reduces the need for an oxygen mask with the additional benefit of improving the visibility of the patients oral cavity
- MRI compatible
- Single Use
- Latex Free

Humidification vents

Naso-Flo® with O₂ port, respiratory indicator and filter

Ventilation adaptor

Ordering details

Naso-Flo® with O₂ port, respiratory indicator and filter

Size	Code	Units per box
3.0mm	NF203	10
3.5mm	NF2035	10
4.0mm	NF204	10
5.0mm	NF205	10
6.0mm	NF206	10
7.0mm	NF207	10
8.0mm	NF208	10
9.0mm	NF209	10

Ventilation adaptor

Size	Code	Units per box
15mm	NF400	50
