#### PERSONAL CARE WIPES

---

Dermatologically tested wipes with added moisturisers for frequent patient use. Ideal for patients to keep themselves clean and fresh.

# carell®

## PERSONAL CARE WIPES

### Patient hand hygiene represents the next big step in infection prevention<sup>1</sup>

Carell Personal Care Wipes are specifically developed to help maintain personal hygiene, for use on the body, hands and faces. Gentle enough for everyday use, they contain aloe vera and added moisturisers to promote healthy, soft skin, helping to improve patient cleanliness and comfort during hospital stays.

Patient hygiene is a critical aspect of HCAI prevention<sup>1,2</sup>. In the hospital environment, areas near the patient and other high touch surfaces have been found to harbour high levels of microorganisms, increasing the risk of infections.

**Carell Personal Care Wipes provide patients with the ability to stay fresh, offering the simplest skin cleansing solution.**
