Sizing Chart

Product Code	Size	Colour
FHCASM	Small-Medium	Yellow
FHCASU	Universal	Navy
FHCASXL	Extra Large	Blue
FHCAS2XL	2X Large	Grey

One of the most frequently reported safety incidents in Hospitals is Falls.

With over 250,000 recorded in the UK every year¹, Costing the NHS over £2.3 billion annually². Not all falls are preventable. However, early identification of the risk factors, along with precise interventions, has been shown to reduce inpatients falls by 20-30%³. One of the suggested interventions is to provide appropriate footwear to patients and residents. While it is not possible to provide shoes to every patient, many hospitals are opting to use Anti-Slip Slipper Socks as one way of trying to reduce the risk of falls⁴, especially when appropriate footwear is not available.
