

# Rollins7™ One Mask

The next generation in oxygen mask for all tasks

The Rollins7™ Oxygen Mask is a replacement mask for virtually every type of situation when addressing respiratory insufficiency and distress. The unique design can accommodate administration of oxygen, aerosol and respiratory medication delivery without compromise.

Nebuliser with oxygen therapy

Aerosol with oxygen therapy

## Patient Safety

- No loss of FiO<sub>2</sub> levels due to mask changes
- Medication delivery without compromising FiO<sub>2</sub>

## Clinical Efficiency

- Efficient FiO<sub>2</sub> escalation and de-escalation management
- Cost effective inventory management

## Patient Comfort

- Accommodates NG and OG tube
- Access for hydration, oral suction and oral medicine
- Wide adjustable strap reduces prolonged use pressure
- Accommodates eyeglass wear

Offload NG or OG tube

Access for oral suction, improved communication and hydration

## 5 - 15 LPM Oxygen delivery

The Rollins7™ Oxygen Mask provides the ability to administer oxygen therapy, aerosol humidification and medication delivery without compromising patient safety.

Ultimately, the Rollins7™ Oxygen Mask is designed to improve patient safety, clinical efficiency and patient comfort.
