

# WOUND CLOSURE DEVICE

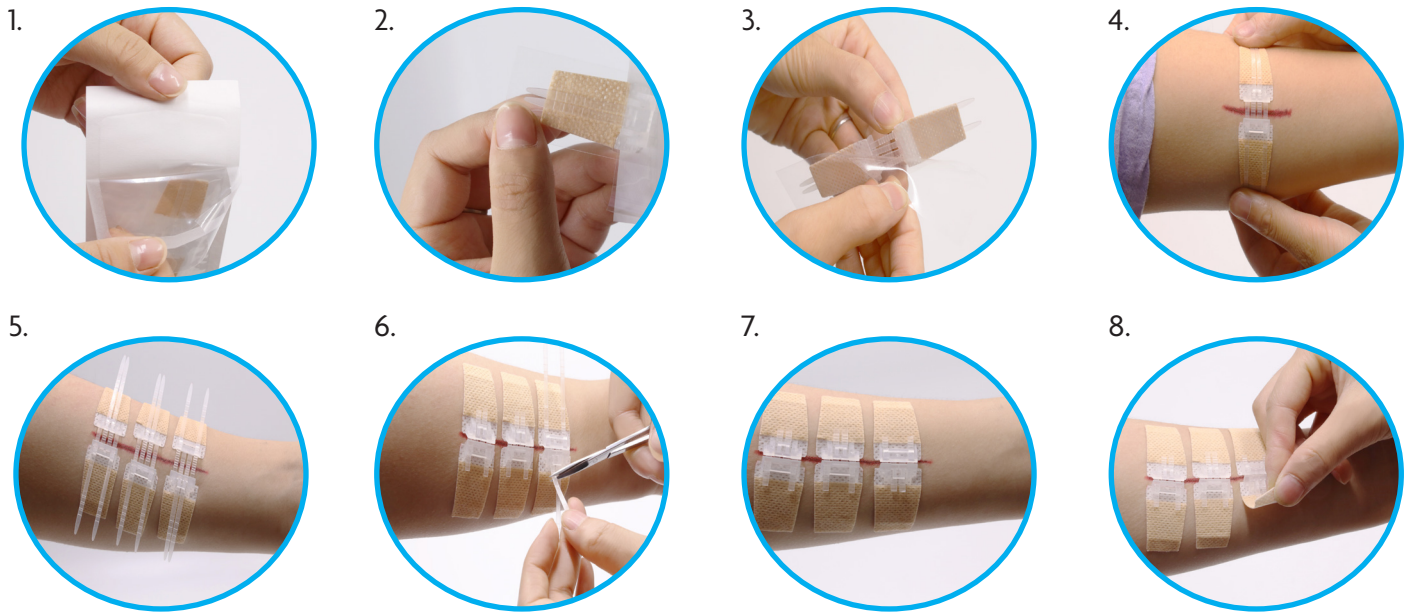

**Non-invasive wound closure device for acute wounds such as lacerations and surgical incisions**

**Designed to allow for a non-invasive closure of a wound and to encourage a tight closure of the wound for early and successful healing**

## FEATURES

- Precise & unique design of the **ribbon** ensures the convenient application and appropriate closure force
- Self-locking **polypropylene hasps** ensure the ribbon will not loosen during recovery.
- **Biocompatible & air-permeable medical adhesive tape** ensures the device can be placed on human skin for long periods
- **Strong & stable holding power** provides enough strength to close the wound
- **180° peel strength** ensures easy removal without any glue residue

### Benefits include

- Reduced tissue trauma
- Reduced risk of infection
- Improved patient comfort
- Potentially reduced scarring
