

Carbon Reduction Plan

Supplier name: Fannin (UK) Limited

Publication date: August 2023

Commitment to achieving Net Zero

As part of our Environment, Health & Safety Policy published annually, DCC Vital including Fannin (UK) Limited, is committed to ensuring environmental impacts are minimised. We will reduce pollution arising from our operations and we will seek to continually improve our environmental performance through sustainable initiatives.

Fannin (UK) Limited is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint¹

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: FY19	
Additional Details relating to the Baseline Emissions calculations.	
Fannin (UK) Limited is part of DCC Vital and has been measuring Scope 1 and Scope 2 emissions since Financial Year 2019 (FY19). FY19 has been set as the baseline. DCC Vital uses the Accuvio IT platform to report energy data from every business, including Fannin (UK) Limited. The Accuvio system then calculates and provides reports on carbon emissions from the energy data using international standards (Greenhouse Gas Protocol) and agreed emissions factors. This process is subject to audit annually and is collated at the parent company DCC plc. for inclusion in the Annual Report. Scope 3 emissions were not recorded in FY19.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	133.01
Scope 2	55.16
Scope 3 ¹ (Included Sources)	N/A - not measured at that time
Total Emissions	188.17 tCO₂e (Scope 1 & 2 only)

¹ Note: the baseline and Scope 3 figures may be subject to adjustment pending further review and assessment of the carbon emissions produced within the business.

Current Emissions Reporting

Reporting Year: FY23	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	47.15
Scope 2	0.0
Scope 1 & 2 Sub-total	47.15
Scope 3 ^{1, 2} (Included Sources)	6,436.39 Included sources: <ul style="list-style-type: none"> • Category 4: Upstream transportation & distribution – 5,821.37 tCO₂e • Category 5: Waste generated in operations – 6.95 tCO₂e • Category 6: Business Travel – 79.76 tCO₂e • Category 7: Employee commuting – 212.50 tCO₂e • Category 9: Downstream transportation & distribution – 315.81 tCO₂e
Total Emissions	6,483.54 tCO₂e

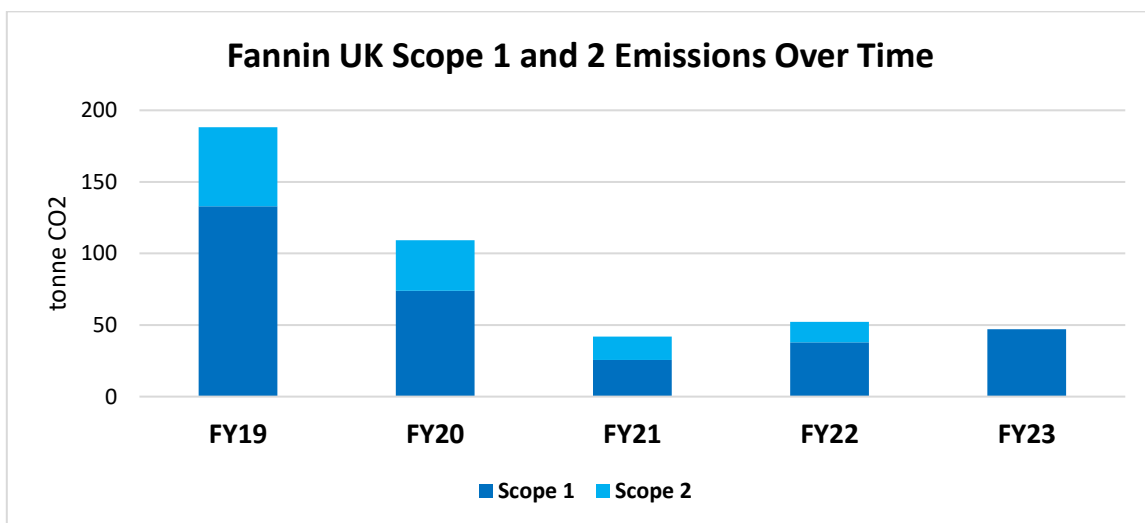

Emissions reduction targets

Objectives & Targets

Aligned with our parent company DCC plc, DCC Vital has set the target to reduce our Scope 1,2 and 3 carbon emissions to net zero by 2045 with the following interim reductions against a 2019 baseline:

- **20% reduction in Scope 1 and 2 emissions by 2025 and**
- **50% in Scope 1 and 2 emissions by 2030.**

Progress against these targets can be seen in the graphs below:

² Scope 3 emissions updated for FY23 Carbon Reduction Plan to include manufacturing activities in addition to commercial and distribution.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the FY19 baseline and the measures will be in effect when performing the contract.

- Conversion of electricity to renewable sources
- Maintenance work on existing solar panels on owned property
- Introduction of hybrid working
- Implementation and use of LED lighting at sites
- Implementation of recycling programmes including removal of plastic disposable cutlery & crockery
- Environmental Impact Assessments completed
- Inclusion of Sustainability targets in performance management process for all managers
- Measurement of Scope 3 carbon emissions baseline for Categories 4, 5, 6, 7 and 9.
- Introduction of Carbon Reduction plans

The carbon emission reduction achieved by the above schemes equates to 141.02 tCO₂e for Scope 1 and 2, representing a 75% reduction against the FY19 baseline.

Further Carbon Reduction Initiatives

In future, we will continue to implement measures to reduce carbon emissions such as:

- Waste Impact Assessments & expansion of Zero to Landfill programmes
- Development of electric car fleet policy
- Evaluation of alternative energy and fuel sources e.g. biofuels, solar energy
- Installation of EV charging points
- Evaluation of the requirements for ISO 14001 certification
- Measurement of all relevant Scope 3 carbon emissions sources
- Engaging with our supply chain partners to review their approaches to carbon reduction and sustainability and to develop reduction targets for Scope 3 carbon emissions.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard³ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁴.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁵.

This Carbon Reduction Plan has been reviewed and signed off by the management team of Fannin (UK) Limited.

Signed on behalf of the Supplier:

Chris Soanes
