

Business-to-Business (B2B) Supply and End-of-Life Disposal Statement: WEEE and Battery Regulations

Fannin (UK) Ltd confirms that all medical devices and associated products are supplied strictly on a business-to-business (B2B) basis. Due to the nature of the products supplied, participation in typical consumer return schemes is not appropriate and may present infection control and hazardous waste risks.

In accordance with applicable WEEE and UK Battery Regulations, responsibility for the safe and compliant end-of-life disposal of all products, including any integrated or contained batteries, rests with the business customer. Business customers must ensure disposal through appropriate clinical and hazardous waste pathways in accordance with local clinical practice.

Mr Chris Soanes,
Managing Director,
Fannin (UK) Ltd
