Fannin - giving you choice quality and savings

Skintact insufflation kits are designed to meet the needs of a busy theatre environment. Reduce preparation time for laparoscopic procedures by allowing to provide you with a combination of products in one convenient pouch.

Each item is sterilized separately giving you the flexibility of using all of the components or just the ones you choose for that particular case. The unused items remain sterile and can be retained for future use.

Kits are customisable to suit your particular needs.
