Easi-VN Pneumoperitoneum Insufflation Needle

Fannin UK Ltd single use pneumoperitoneum insufflation needle provides a reliable, safe, cost effective means of gas insufflation in laparoscopic surgery

Single Use Latex Free : Guarantees sterility & sharpness, avoiding difficult time consuming cleaning and re-processing of reusable needles which may be blocked, blunt or malfunctioning

Sizes: Available in two sizes 120mm (14G) - 150mm (14G)

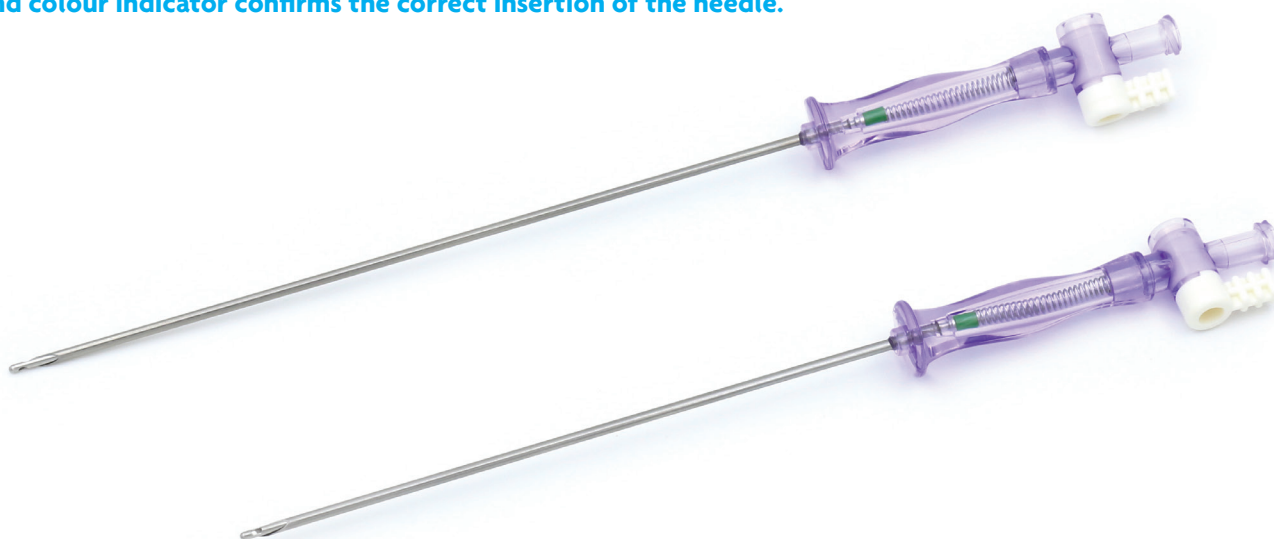

Sharp Bevelled Tip: Quick, safe and easy insertion

Obturator : Smooth retracting obturator minimises risk of accidental adjacent organ damage

Injection Moulded Hub: comfortable grip, strong and no risk of needle detachment

Luer Lock with stop cock: Easy connection and control of gas

Fannin can offer both a standard and audible veress needles, the audible sound and colour indicator confirms the correct insertion of the needle.

SUTURE GRASPER

Suture Grasper - Mediflex Surgical Products

Mediflex offers a full line of Suture Grasper devices to maximise patient safety and surgical efficiency

- 14-gauge stainless steel device attached to an ergonomic handle Innovative design securely holds suture in place
- Percutaneously pass and retrieve sutures
- One-hand function with comfortable finger platforms for tactile control Grasper arms permit easy suture access & retrieval
- Multiple clinical applications
- Accommodates 0 to 2.0 suture sizes

- Single-use - disposable
- Non-sterile
- Latex-free

Applications

Port Closure - Without extending the incision, enables the surgeon to rapidly close each laparoscopic port securely and safely while pneumoperitoneum is maintained

Ventral Hernia Mesh Fixation - Allows the surgeon to temporarily fixate the mesh corners or center prior to final placement; prevents mesh migration

Organ Anchoring - Facilitates percutaneous anchoring of organs

Percutaneous Suturing - Excellent choice in any procedure requiring percutaneous suturing in lieu of utilizing an additional trocar

Vessel Ligation - Tying a knot around a bleeding vessel too large to coagulate can provide effective haemostasis

DIATHERMY POUCH & QUIVER

Diathermy Pouch

- **Sterile** - Single use 45cm x 33cm
- **Heavy Duty** Tough Polyethylene Instrument Pouch
- **Two** compartments
- **Strong Adhesive strip** to securely attach pouch to drape
- **Convenient:** Allows close placement of instruments in the sterile field during surgery
- **Latex Free**

Disposable Sterile Extending Diathermy Quiver

- **Single** use
- **Double wrapped** sterile
- **Single Quiver 200mm** with optional Extension tube giving over length 400mm x 65mm
- **Lightweight**, strong with attachment loops
- **Latex Free**
